

TWIST & GO

ENGLISH

A product of Towi Products • www.twistengo.nl • info@twistengo.nl

1. Does the luggage not fit in your boot? Twist+Go is the solution.

2. Press the Twist+Go on a dry rear window.

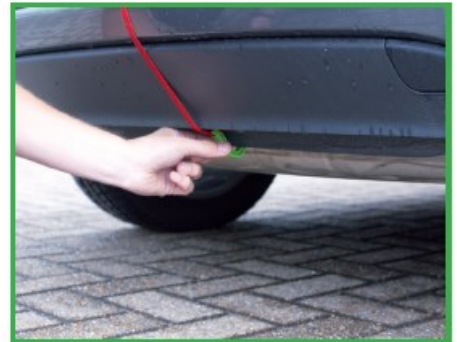

3. Turn the grey part to the right until you hear a click.

4. The Twist+Go is now securely attached to your window.

5. Pull the green hook. The red cord will now come out of the Twist+Go.

6. Attach the green hook somewhere secure like the lower edge of the rear bumper or towing hook eye.

7. Slide the red button to the right.

8. Turn the green part to the right until the red cord is tightened enough.

9. The red cord keeps the boot lid in place and stops it from opening.

10. Loosening: slightly turn the green part to the right and move the red button, at the same time, to the left. The red cord will automatically rewind.

11. Removing: Pull the Twist+Go off the rear window by lifting on the transparent tabs.

12. Preparing to use again: push the red slider button up and turn the grey part a quarter to the left.
